What is the caBIG Learning Management System (LMS)?

All caBIG and NCI CBIIT training is tracked through Training Partner, the caBIG Learning Management System. Learners may browse training courses and materials (by topic or role), register for courses, and complete any required quizzes or tests.

Do I need to create an account?

Most courses are accessible without an LMS account through links under the Course Materials section of the course description page. The exceptions to this are any instructor-led courses or any courses that have quizzes associated with them. For example, you will need to create an LMS account if you are interested in the caCORE curriculum because the self-paced courses have quizzes that you must pass to complete the course and you must have an account to register for the instructor-led caCORE courses. Once you [Create an account](#), you will receive an email with your password and can log into the [caBIG LMS](#).

I am interested in finding training - How do I use the LMS?

- If you have never used the LMS, check out the [Getting Started with LMS](#) guide.
- For more detailed instructions on how to use the LMS, check out the [LMS Self-paced Training](#) course.

I have created training materials- How do I get them in the LMS?

- All training materials must be approved by a workspace lead or product manager before they are made available to the public.
- To have a course created in the LMS, email the following information to res-ncincibtraining@mail.nih.gov:
 - Course Name
 - Course Level; Beginner, Intermediate or Advanced
 - Workspace or area of interest it falls under
 - Course Description - This will be posted to the public, please edit accordingly.
 - Course Objectives
 - Link to posted course materials
 - Any additional materials such as quizzes or special instructions.
